Confessions of a Dope Fiend

Why a "Hop Head" Doesn't Like a "Snow Sniffer" and the Differences Between Addicts of the Two Poisons - The Sufferings of a Dope Fiend When Deprived of the Drug. Society Is Also a User of the "Stuff."

a pipe flend doesn't care for a slave to "coke" or morphise.

"Dope Plends" Nor Illiterate.
Do not think for the minute that drug fleads have their brains eaten away by the daily use of drugs for such is by no means the case. For instance, we'll take the "gun moll," or female pickpocket, who makes the subways of New York her bangout. She takes a 10 grain "shot" about 6 a. m. and starts out to meet the express trains crowded with men going to their business. She manages.

You can readily see that once dope sets a good grip upon its users there is no earthly chance for survival. He must go down into the pits of hell. There's no stop.

Environment Is to Blame.

Some dope fiends have an alibit that it was the doctors, fault because he's a drug user, claiming that he was operated upon in a hospital and was given a shot of "M" on the surgeon's table. That's all a childish lie. It's just the environment and there's no one can tell me otherwise. If I was not for had going to their business. She manages to beat her "suctor" all the time, for if his "leather" (purse or wallet)

for if his "leather" (purse or wallet) is put tightly in his pocket, why. Miss "Silek Crook" is there with a little instrument—a small gold ring which has a piece of a Gillette rasor blade soldered into it. While slipping her fingers into her victiu's pocket she cuts his pocket, making it very easy to get his "poke."

How Fainting Bertha Works.
Then we have the notorious "dope fiend" whom the police call "Fainting Bertha." She takes her part off fine, because the use of cocaine has given her a sickish look, yellow and sunken fane. Her graft when "it up" is to go down to Wall street the financial district, and fall into a faint before a crowd of curb stock brokers. Of course you know that a man will always come to the sid of the weaker sex when they're in

brokers. Of course you know that a man will always come to the aid of the weaker sex when they're in trouble, and while the picked victim bends'down to hold her head in his lap while walting for an ambulance, she raises her head towards his faces and with her teeth nabs his pract or diamond stickpin.

She played this trick once too eften and is now serving time in Auburn. N. Y. a state's prison for females. A central office man pul some kind of a harmiess drug on his stickpin and she did now faint much longer for this drug was as bitter as gall. She always bit a piece of scap to make the front come from her mouth while making ready for her next victim.

They have some of the greatest ideas mentionable for getting mones to buy "happy dust".

Never Hit the "Pipe."

Up to this day I cannon undersiand with I sceered clear of this pipe. A pipe fiend is as yellow as a lemon and always remains that color. As I stated in my article like Similary, a dope fiend cannot be trusted or relied upon. This "hop smokes" I met at the Tombs tool no that should he so up against the nearly he hoped it would strike a a stork killing him instantia. He scene still alive.
